# 1 Executive Summary

This Mobility Management Plan (MMP) has been prepared for Fronville Ltd to accompany a planning application for the proposed Large-scale Residential Development (LRD) located at Kinsale Road, Cork City.

The applicant, Fronville Ltd, recognises the need for all significant transport generators to play a role in meeting the objectives set out in the Department of Transport Document titled "Smarter Travel: A Sustainable Future – A new Transport Policy for Ireland 2009-2020" which sets out ambitious targets with respect to delivery of sustainable transport modes.

This MMP therefore outlines the provisions proposed to be put in place as a means of reducing car dependency associated with the development in the interest of compliance with the following sustainable transport initiatives:

- Cork City Council Development Plan 2022-2028
- Cork City Development Plan 2022-2028
- Cork Metropolitan Area Transport Strategy 2040
- The National Sustainable Mobility Policy
- Climate Action Plan 2023
- National Investment Framework for Transport in Ireland (NIFTI)
- The need to reduce transport emissions to meet EU 2030 greenhouse gas reduction targets; and
- The need to reduce traffic congestion, particularly at peak commuting times.

The key MMP proposals being put forward in relation to the development are:

- Reduced provision of car parking in the proposed development
- Provision of high-quality connectivity for pedestrians and cyclists at this central sustainable location
- Cycling facilities have been prioritised
- Promote the use of cycle facilities and public transport
- Promote cycling, public transport and car sharing for residents

The applicant will encourage and provide information to residents to promote the achievement of Smarter Travel mobility targets individually and co-operatively through various measures outlined herein.

This MMP sets out the key proposals for the development based on current transportation data for the development. The applicant has confirmed an unreserved adherence to the principles of Smarter Travel.

This MMP is to be considered an active document and will be amended and added to in the future to achieve the sustainable transport targets set. A Mobility Manager/Travel Coordinator role will be held within the management company operating the facility to promote this MMP. Templates and checklists are provided with this MMP to assist in achieving the sustainable travel objectives set out therein.

# 2 Introduction

This Mobility Management Plan (MMP) has been prepared to accompany a Planning Application for the permission for a proposed Large-scale Residential Development (LRD) at a site located at Kinsale Road, Cork City was formerly owned by Vita Cortex. The site has been disused since 2012. Planning permission was granted for the demolition of site structures under application reference no. 2140647, and separate planning permission (Ref. 2442868) was obtained for remediation works on the site. Remediation works involved the excavation and off-site disposal of impacted soils, the pumping and treatment of groundwater, and the importation of stone/soil for backfilling.

The proposed works are outlined in a series of architectural drawings prepared by BKD Architects and engineering drawings prepared by PUNCH, supplied as part of this planning submission.

## 2.1 Site Location

The proposed site is located south of Cork City Centre and is bounded by residential and commercial properties to the north and north-east, Kinsale Road to the east, Virgin Media Park and a retail premises to the south and south-east, and Pearse road to the west. The overall topography of the site is relatively flat with a steep embankment located along the western boundary.

The brownfield site is located approximately 2.0 km south of Cork City, 2.3km south of Cork City Bus Station (Parnell Place), and 3.1km south of Kent Train Station. The location of the site lends itself to being highly accessibly to pedestrians, cyclists, public and private transport.

All of this makes the site highly accessible to pedestrians, cyclists, public and private transport and is considered a Sustainable Location. The site location in relation to the wider road network is shown in Figure 2-1 below.

**Figure 2-1: Location Map of the Site and Surrounding Road Network. (Ref Google Maps)**

## 2.2 Proposed Development

The proposed works are outlined in a series of architectural drawings prepared by BKD Architects and engineering drawings prepared by PUNCH Consulting Engineers and supplied to accompany this report.

The proposed development will consist of a Large-Scale Residential Development (LRD), comprising 170no. residential units (158no. apartments and 12no. townhouse apartments, to include 51no. 1-bed units, 84no. 2-bed units, 35no. 3-bed units) arranged in 4no. blocks varying in height from four to nine storeys over ground. The proposed development also includes a crèche; café; management office; 4no. retail units; car parking and cycle parking provided on surface and within an undercroft; the provision of private, communal and public open space and all associated site development, landscaping and drainage works on the site of the Former Vita Cortex Facility, Kinsale Road and Pearse Road, Cork.

Access to the proposed development will be from both Pearse Road and Kinsale Road. Two access points are proposed along Kinsale Road: a vehicular, cyclist and pedestrian entrance to the retail parking area, and a pedestrian and fire tender route that extends centrally through the site. Similarly, two access points are proposed along Pearse Road: one for vehicles and cyclists to access the undercroft parking area, and a dedicated pedestrian access that runs through the centre of the site.

The proposed layout for the development is detailed in the series of drawings by BKD Architects accompanying this report and an extract is included in Figure 2-2.

**Figure 2-2: Proposed Site Layout**

## 2.3 Objectives of the Plan

This MMP outlines the provisions that the applicant proposes to put in place as a means of promoting sustainable transport, active travel and reducing car dependency associated with the proposed development, in the interest of compliance with the following sustainable transport initiatives:

1. Department of Transport national policy, Smarter Travel: A Sustainable Transport Future – A New Transport Policy for Ireland 2009-2020, which provides that 500,000 more people will take alternative means to commute to work to the extent that the total share of car commuting will drop from 65% to 45%;
2. The National Cycling Policy Framework 2010 Target, which provides that cycling will be developed in Ireland to the extent that 10% of all trips, including commuting, will be by bike by 2020;
3. The Cork City Development Plan 2022-2028 aims to coordinate land-use and transportation planning to boost active travel (walking and cycling) and encourage greater public transport use. Support the implementation of key transport projects outlined in the Cork Metropolitan Area Transport Strategy (CMATS) to promote multi-modal transportation and smart mobility, ensuring accessibility for everyone.
4. In accordance with the Cork City Development Plan 2022-2028, the vision for transport in the County is to establish an efficient system that enhances connectivity and competitiveness while making sustainable travel modes a desirable and convenient option for as many people as possible, contributing to economic, social, health, well-being, environmental, and climate action benefits.
5. The vision of the Cork Metropolitan Area Transport Strategy 2040 is to establish an integrated transport network that caters to all modes of transport, enhancing travel options, improving overall network performance, and providing the capacity to meet travel demands while supporting economic growth
6. The need to reduce transport emissions to meet EU 2030 greenhouse gas reduction targets; and
7. The need to reduce traffic congestion, particularly at peak commuting times.
8. Climate Action Plan 2023

The objectives of the MMP for the proposed development are as follows:

a) To encourage/increase the use of public transport, walking and cycling for residents and visitors for work-related travel and to facilitate travel by bicycle, bus and train.
b) To reduce the overall number of single occupant vehicles trips for journeys to and from the development.
c) To integrate mobility management into the development decisions, policies and practices to work closely with governing bodies on means and use of transport services around the vicinity of the development site
d) To provide information and have resources readily available to increase awareness and continue education on sustainable modes of travel for both residents and visitors to the development
e) To increase car-pooling amongst residents.

The Mobility Management Plan (MMP) can lead to benefits, such as offering substantial savings by suggesting alternatives to travelling from the residential development, primarily to and from work (other than by car), allowing commuters to avail of a healthier lifestyle by incorporating exercise into the daily commute and reducing stress experienced by residents caused by lack of alternatives in commuting to work.

The MMP should be considered as a dynamic process where a package of measures and campaigns are identified, piloted and monitored on an ongoing basis. The nature of the plan therefore changes during its implementation in that some measures prove successful and are therefore retained while others are not supported and are discarded. It is important that the plan retains the support of users and receives

continuous monitoring. Feedback and active management of the plan is required for it to continue to be successful.

## 2.4 Census Data

Using the Central statistics Office (CSO) data, it could be seen that the proposed development is located in the area illustrated in Figure 2-3.

Figure 2-3: Central Statistics Office - Small Area Map (A048005001)

Using the census data for 2016 and comparing it to 2022, it could be seen that people travelling by on foot, bicycle, and public transport have remained largely the same. It should be noted however that there has been more than 10% increase in people working from home, this resulted in an approximately 8% decrease in car usage during the same period.

Table 2-1: CSO Data for 2016 and 2022 for Small Area - A048005001

| Population aged 5 years and over by means of travel to work, school, or college | | | | |
|---|---|---|---|---|
| Means of Travel | 2016 | | 2022 | |
| | No. | % | No. | % |
| On Foot | 31 | 27% | 36 | 28% |
| Bicycle | 2 | 1% | 1 | 1% |
| Bus, minibus or coach | 7 | 6% | 6 | 5% |
| Train, DART or LUAS | 0 | | 1 | |
| Motorcycle or scooter | 3 | 3% | 0 | 0% |
| Car Driver | 38 | 60% | 34 | 52% |
| Car passenger | 22 | | 25 | |
| Van | 7 | | 8 | |
| Other (incl. lorry) | 0 | 3% | 0 | 14% |
| Work mainly at or from home | 1 | | 10 | |
| Not stated | 2 | | 8 | |
| **Total** | **113** | **100%** | **129** | **100%** |

Comparing the data in Table 2-1 with the Cork Metropolitan Area Transport Study (CMATS) Modal Share Outcomes for 2040 illustrated in Table 2-2, it can be seen that the percentage of people walking is approximately 7% higher than the CMATS outcomes for 2040 while cycling remains approximately 9% lower than CMATS outcomes for 2040. Public transport users are well below targets set out for 2040. It should be noted that due to the increase in people working from home, the amount of car users in the vicinity of the development has decreased to within approximately 2% out the CMATS outcomes for 2040.

Table 2-2: CMATS Modal Share Baseline and Outcomes for 2040

| CMATS Modal Share Baseline and Outcomes | | | | |
|---|---|---|---|---|
| **Mode** | **Walking** | **Cycling** | **Public Transport** | **Car** |
| **Existing** | 21% | 1% | 10% | 66% |
| **Outcomes (2040)** | 21% | 10% | 25.7% | 49.3% |

# 3 Site Conditions

This section gives an overview of the accessibility of the options for travel associated with the proposed development.

## 3.1 Site Access

The proposed site will feature multiple pedestrian and cyclist access points, including a central pedestrian thoroughfare that will enable easy movement between Pearse Road and Kinsale Road. The site is designed to be fully accessible to both pedestrians and cyclists, ensuring seamless connectivity throughout. Vehicular access will be provided via two points: one along Kinsale Road, just north of the Slieve Mish Park/Kinsale Road intersection, and another along Pearse Road. The Pearse Road access will include a ramp leading to a basement level and will also accommodate cyclists with a dedicated two-way cycle lane.

## 3.2 Parking

There are 83 no. proposed parking spaces on site. Car parking serving the proposed development is to be provided within the on-site car park located in the newly constructed basement located between Block 2 and Block 3, with additional parking provided north of Block 4. It is proposed to provide 6 No. disabled car parking spaces (3 of which have EV capabilities) and 16 No. EV parking spaces parking spaces (3 of which are designated as disabled car parking spaces). Please refer to architectural documentation for proposed locations of all parking.

### 3.2.1 Car Parking

The Cork City Development Plan (CCDP) 2022-2028 applicable car parking standards are noted in Table 11.13. Four parking zones have been designated within the City to ensure sufficient residential parking and car storage while managing destination parking for non-residential uses. These zones also provide greater flexibility in parking requirements for sites that are well-served by public transport.

- Zone 1
  - Cork City Centre and Inner City.
- Zone 2
  - Areas accessible to mass transit alongside public transportation corridors. This zone includes areas within 500m of Blackpool/Kilbarry Station and may be expanded in the future to reflect improved access to mass transit across the City (existing, committed and indicated).
- Zone 3
  - Urban Towns of Ballincollig (excluding the Town Centre), Blarney, Glanmire, Tower, City Suburbs including Ballyphehane.
- Zone 4
  - City Hinterland, Kerry Pike, Killeens, Upper Glanmire.

As noted in the CCDP, the proposed development is located in Ballyphehane and as such is located in Zone 3 of the Car Parking Management Zone. Bus Connects Cork is proposed to serve these areas of Cork City. It is envisaged that parking standards serving this zone will be reduced to reflect the level of public transport services over time.

Referring to Table 3-1, it could be seen that the total number of car parking spaces provided for the development amounts to approximately 22% of the maximum residential car parking quantum as defined by requirements outlined in the Cork City Development Plan 2022-2028 (Chapter 11, Table 11.13):

**Table 3-1: Cork City Development Plan Parking Standards**

| Development Type | Units/ Gross Floor Area (m2) | Car Parking Standards | Maximum Car Parking Allowed | Total Provided |
|---|---|---|---|---|
| Residential (1-2 Bedroom) | 135 No. | 1.25 per dwelling | 169 | 58 |
| Residential (3 - 3+ Bedroom Unit) | 35 No. | 2.25 per dwelling | 79 | 1 |
| Creche | 290 $m^2$ | 1 space per 3 staff + 1 space per 6 children (104 Children and 21 Staff)* | 25 | 2 |
| Management Offices | 110 $m^2$ | 1 space per 50sqm | 3 | 2 |
| Retail (Convenience Retail) | 943$m^2$ | 1 space per 20sqm | 48 | 20 |
| **Total** | | | **324** | **83** |

***Density of children in creches and Staff-to-Child Ratios in accordance with The Childcare Act 1991 (Early Years Services) Regulations 2016.**

### 3.2.2 Electric Vehicle (EV) Charging Points

In accordance with the Cork City Development Plan 2022-2028, multi-unit residential developments must provide at least one EV-equipped parking space for every five parking spaces. Additionally, all other parking spaces should be outfitted with the necessary infrastructure (ducting) to allow for the future installation of EV charging points.as such, a total of 16 No. EV parking spaces will be provided throughout the development with all locations being fully equipped with a functional EV Charging Point. It should be noted that 3 No. out of the total 16 No. EV parking spaces are designated as disabled car parking spaces).

## 3.3 Pedestrians

The proposed development is located along Kinsale/Pearse Road in Ballyphehane which is approximately 2.5km form Cork City Centre. The site is fully accessible along Kinsale road where it is envisaged that the existing footpath will be integrated into eastern perimeter of the site. Regarding Pearse Road, pedestrians will be able to travel through the centre of the site via a dedicated pedestrian/cycle path that would extend from Pearse Road to Kinsale Road.

The site is in proximity to a number of primary (PS) and secondary (SS) schools, shopping centers, employment areas and is well served by a variety of commuter options.

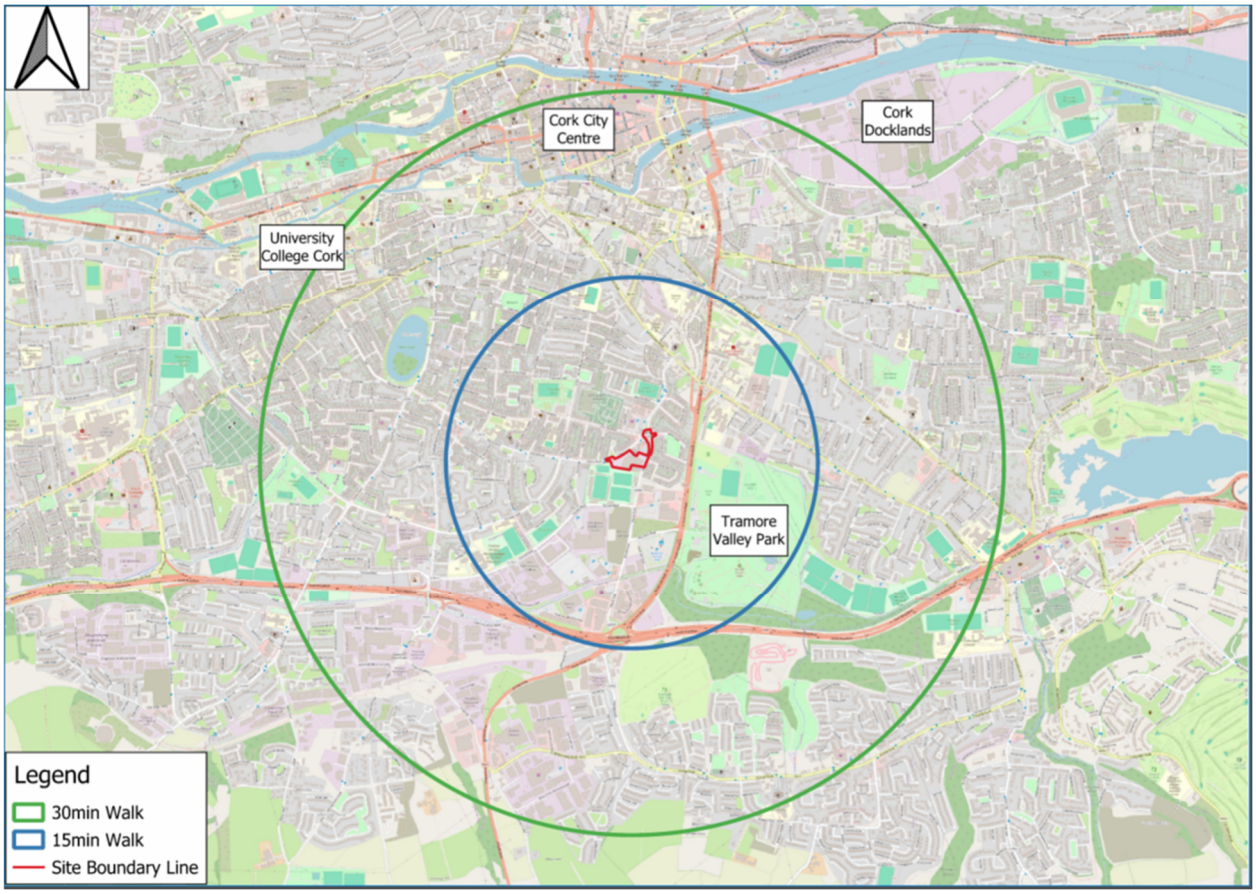

**Figure 3-1: Walking Distances from the Site**

## 3.4 Cycling

Since the development is located approximately 2.5km south of Cork City Centre, Access to the development could be via Kinsale Road or Pearse Road, there will be 304 sheltered and 50 unsheltered on site. Referring to Figure 3-2 and according to the Cork Metropolitan Area Transport Strategy, both access roads have been classified as primary cycle routes. Primary routes are typically direct and provide medium-long radial connections to key destinations across the Cork Metropolitan Area (CMA).

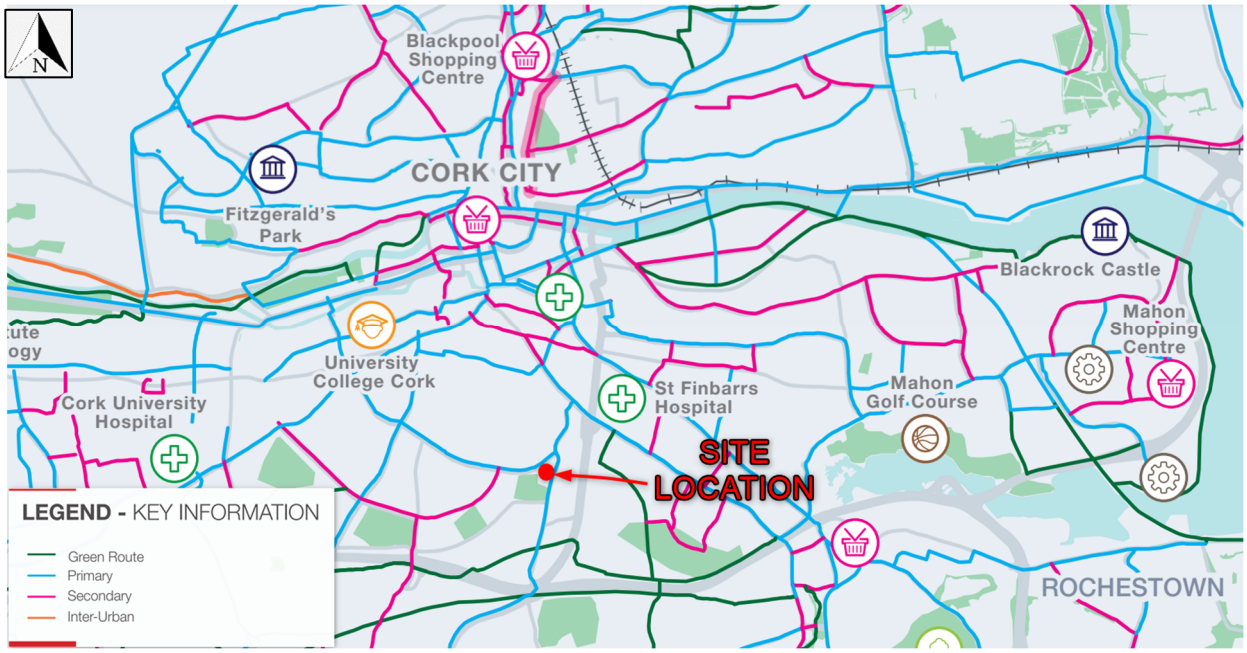

**Figure 3-2: Cycle Network Map**

Cycling is to be significantly encouraged as part of the development. Cycle parking serving the Proposed Development is provided in accordance with Cork City Council Development Plan Cycle Parking Requirement for New Developments. Refer to

Table 3-2 for the applicable cycle parking standards.

**Table 3-2: Cork City Council Development Plan Cycle Parking Requirement for New Developments**

| Unit Type | Minimum Requirement | No units/Gross Floor Area ($m^2$) | Minimum Required Spaces |
|---|---|---|---|
| Standard Apartments | 0.50 Per Unit in Suburbs | 158 | 79 |
| 2/4 bed Mid Townhouse Units | 1 space per unit | 12 | 12 |
| Creche | 1 Per 25 Children | 1 space per 3 staff + 1 space per 6 children (104 Children and 21 Staff)* | 5 |
| Management Offices (General Offices) | 1 Per 150$m^2$ GFA | 110 $m^2$ | 1 |
| Retail (Convenience (Food) Store) | 1 Per 100$m^2$ GFA | 943$m^2$ | 10 |
| **Total** | | | **107** |

***Density of children in creches and Staff-to-Child Ratios in accordance with The Childcare Act 1991 (Early Years Services) Regulations 2016.**

It is proposed to provide 324 secure cycle parking spaces for residents and 147 cycle spaces for visitors across the proposed development site. The number of cycle parking spaces proposed is greater than the minimum requirement required by the Cork City Council Development Plan, and as such provide improved encouragement for bicycle use.

## 3.5 Public Transport

### 3.5.1 Bus Services - Cork City Bus and Train Services

A range of public transport routes are available in Cork City within the vicinity of the proposed development, as described in the following sections of this MMP and shown in Figure 3-3 below.

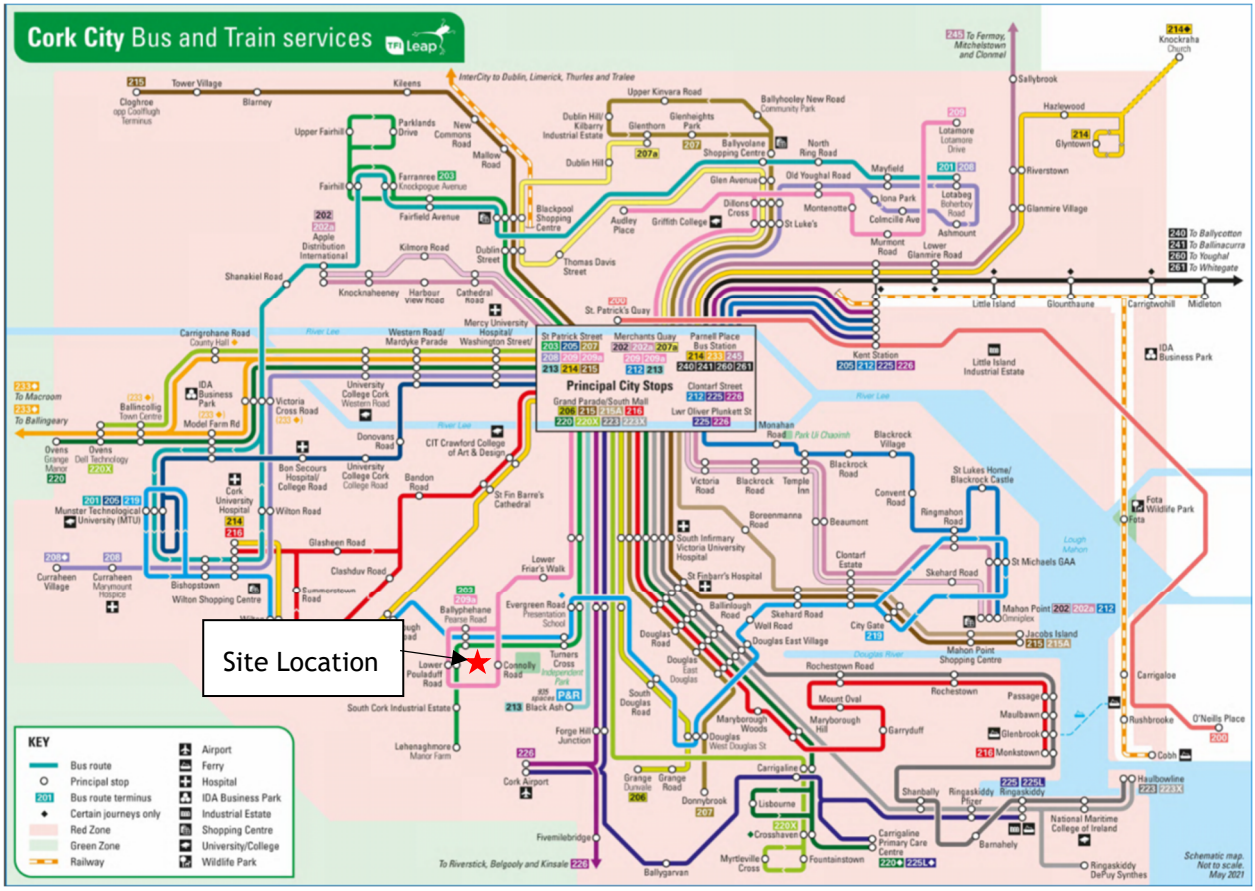

**Figure 3-3: Cork City Bus and Train Network (Ref: tfi.ie)**

### 3.5.2 Bus Stops

Figure 3-4 below shows the location of local bus stops within 500m (5-7min walk) of the proposed development. The nearest bus stops to the proposed development would be the O Growney Crescent Bus Stop and Rugby Stadium Bus Stop, both of which are approximately 40m west of the Pearse Road basement ramp entrance.

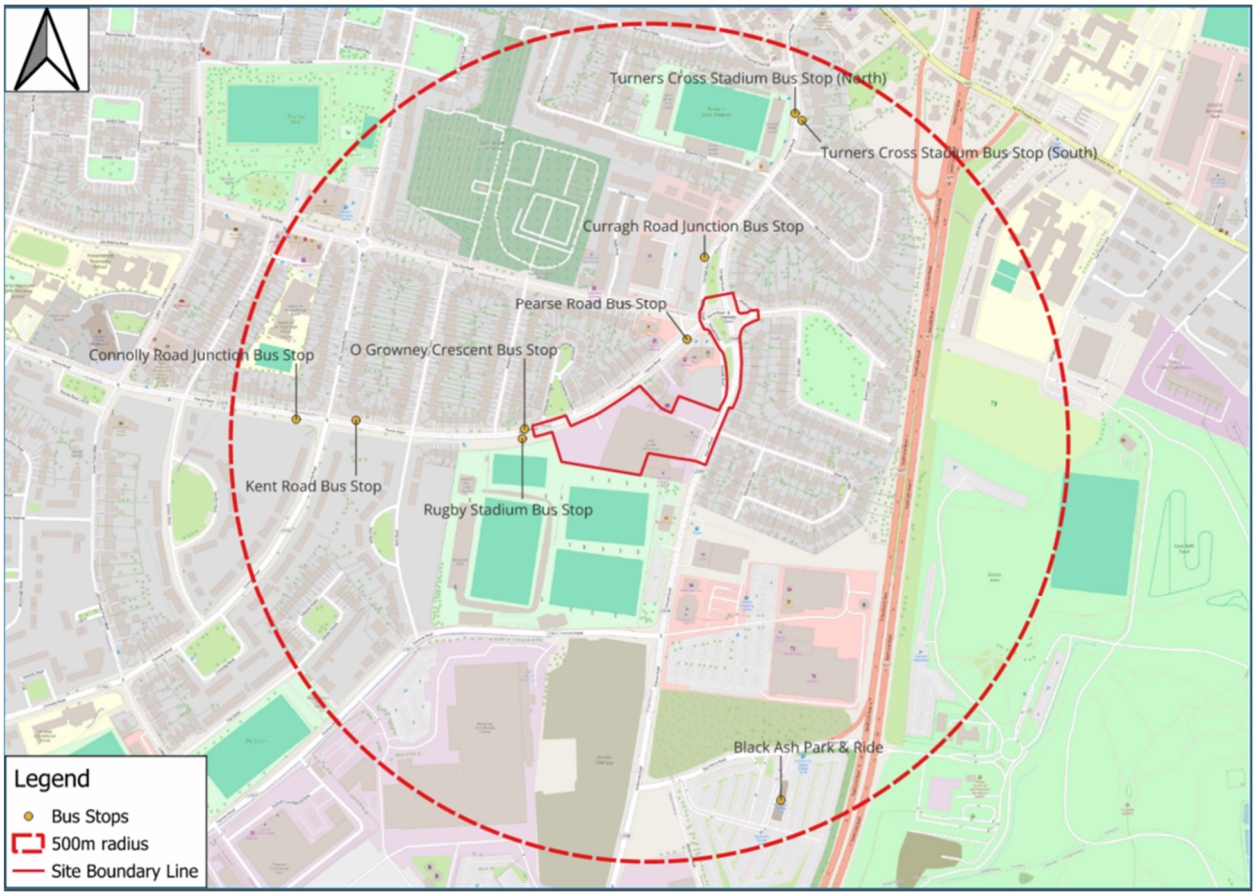

**Figure 3-4: Location Map Showing Nearby Bus Commuter Options**

**Table 3-2: Local Bus Stops**

| Bus Stop ID | Stop Name | Routes | Walking Distance* |
|---|---|---|---|
| 242231 | Connolly Road Junction | 203,219 | 450m |
| 242301 | Kent Road | 203,219 | 400m |
| 242221 | Rugby Stadium | 203,219 | 200m |
| 242311 | O Growney Crescent | 203,219 | 200m |
| 242211 | Pearse Road | 203,219 | 200m |
| 248631 | Curragh Road Junction | 203,219 | 250m |
| 242611 | Turners Cross Stadium (North) | 203,219 | 500m |
| 243821 | Turners Cross Stadium (North) | 203,219 | 500m |
| N/A | Black Ash Park & Ride | 213 | 750m |

***Distance taken from the centre of the site**

### 3.5.3 Bus Services - BusConnects Network

Enhancing the bus network is consistent with the National Development Plan 2018-2027 which envisages a significantly enhanced BusConnects service for Cork by 2027. Prioritising bus services above general traffic is critical to the delivery of an efficient, frequent, and reliable bus system and is a major part of the overall BusConnects programme. As illustrated in Figure 3-5, the BusConnects Priority Network extends along Kinsale and Pearse Road, allowing for ease of access to the network.

**Figure 3-5: BusConnects Priority Network**

Consultation with the NTA has ensured that the site layout for the proposed Large-scale Residential Development (LRD) has aligned with the future BusConnects corridor along Kinsale Road. Please refer to Appendix E for correspondence from the NTA regarding the provisions for the BusConnects corridor.

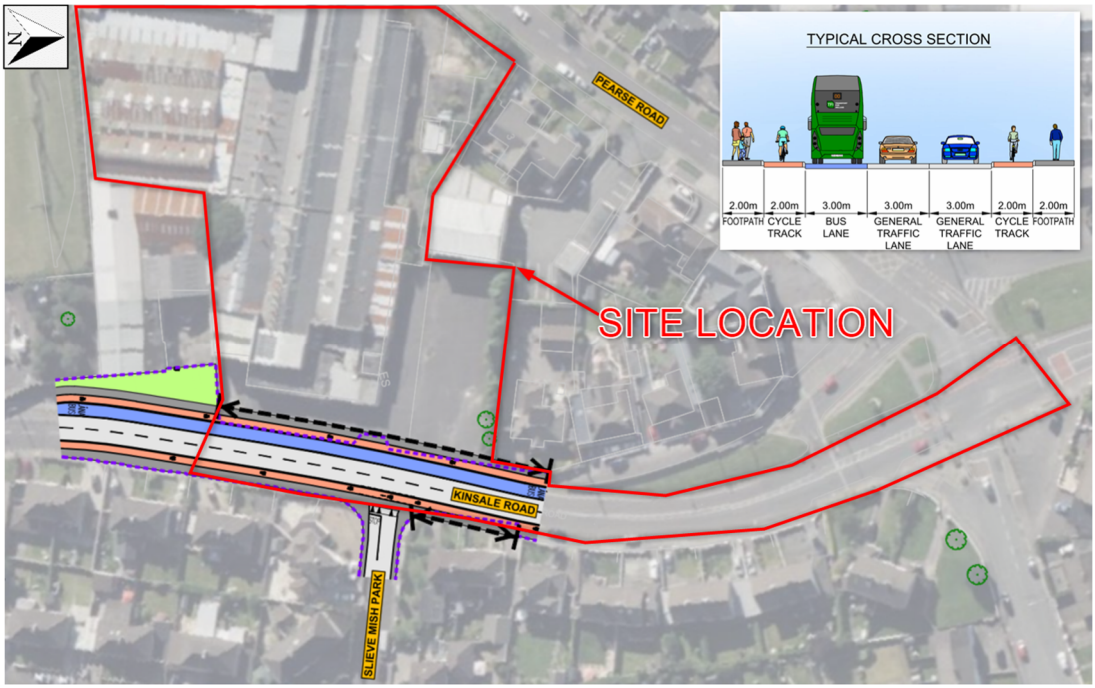

**Figure 3-6: BusConnects Corridor along Kinsale Road**

The National Transport Authority (NTA) launched its latest design for the Cork Metropolitan Bus Network in June 2022. The new network, part of BusConnects Cork, is intended to transform the public transport network across the Cork Metropolitan Area. The network will involve the creation of new bus routes and improved bus frequencies to help transform the public transport network to meet anticipated growth and future demand in the region. BusConnects will provide an overall increase of 53% in bus services in Cork.

Route 6 comprising Grange Road - Black Ash Park & Ride (via Douglas Road and UCC) is a significant two-way route for the development site with regular 15-minute frequency services planned for Monday-Saturday and a 20-minute service on Sundays.

Other extensive routes that will serve the development via the nearby Blash Ash Park & Ride facility include:

- Route 13: Cork Airport – Kent Station (Daily 30-minute frequency)
- Route 14: Cork University Hospital – Mahon Point (Weekdays 15-minute frequency, Weekends 30-minute frequency)
- Route 23: Old Youghal Road via the City Centre (Monday – Saturday 60-minute frequency)

Refer to Figure 3-6 for an extract from the BusConnects Cork City Centre network map.

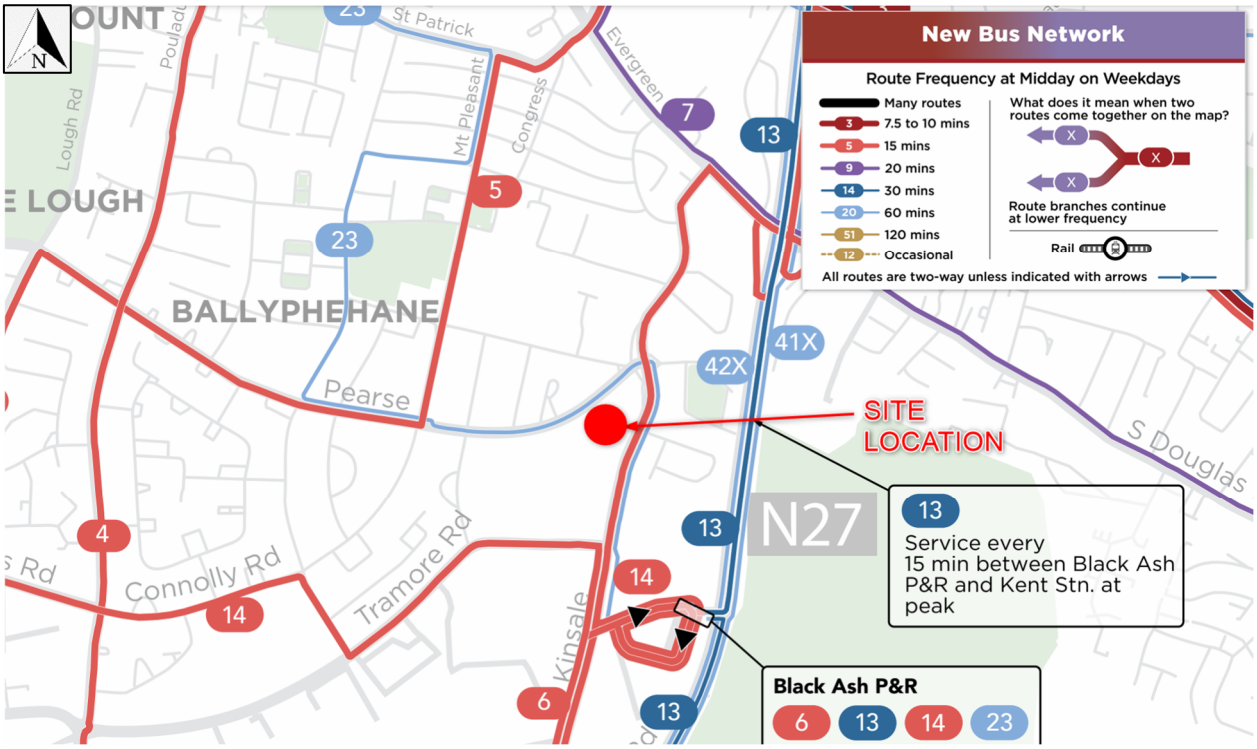

**Figure 3-7: Extract from Bus Connects Cork City Centre Network Map**

### 3.5.4 Taxi Services

There is a constant flow of taxis along Kinsale Road collecting and depositing passengers. This will facilitate taxi use by providing a safe and convenient means of accessing this form of transport. The objective is to encourage lift sharing in taxis to help reduce the demand on parking and congestion at peak times.

# 4 Mobility Management Measures

The measures identified are a mixture of policies and incentives designed to encourage changes in travel behaviour and sustain a low rate of single-occupant car use. The measures are designed to be implemented over a period of time, allowing costs to be spread and ensuring that policies and incentives are implemented together.

While little may be observed in terms of travel behaviour in the short term, as implementation gains momentum so will the impact in terms of travel behaviour. The mobility management measures in the Travel Plan can be grouped under the following headings:

- Marketing and Communications
- Walking and Cycling
- Public Transport
- Implementation/Consultation/Monitoring

## 4.1 Marketing and Communications

The education of development occupants and visitors on the Mobility Management Plan initiatives and the necessity of contribution is extremely important. The services available must be communicated in a consistent and continuous manner to sustain behaviour change.

Communications will include promotional initiatives and activities aimed at informing the development occupants and visitors of the existing and proposed transport networks. Such initiatives and activities will include:

- Promoting the Mobility Management Plan through both internal communications and external avenues.
- Development an Access Map to show public transport facility locations and to highlight safe walking and cycling routes. In addition to this, Travel Information Points should be established at dedicated on-site locations, to make development occupants and visitors aware of the mode choices available in and around the development site. The Travel Information Points should be conspicuously located and provide travel and mobility information such as maps, public transport routes and timetables, leaflets, etc.
- Preparing a formalised Sustainable Travel Information Pack, which is to be provided to all new development occupants. The Pack will contain all the information relating to the Mobility Management Plan, including the Mobility Access Map and the locations of cycle parking, etc.
- Developing a digital Travel Information Point for the development, in the form of a dedicated website and/or a mobile app. This will provide details of travel options to the site, as well as linking to external websites relevant to visiting the development.

## 4.2 Walking and Cycling

All pertinent safe walking and cycling routes should be identified within a radius of at least 5km around the development site. These routes will be selected with regard to:

- Availability of footpaths and cycle paths
- Safety at crossings
- Signage
- Lighting

It should be ensured that bicycle parking for development residents and visitors is secure, easily accessible and sufficiently sheltered.

Other measures which could be adopted include:

- Promote the Cycle to Work scheme.
- Encourage the establishment of a bicycle users group within the developments and online cycling forum or cycling events for residents.
- Carry out a follow up site audit of residents a few months after occupation of development to gauge ease of access, use of facilities and possible improvements.

## 4.3 Public Transport

The proposed measures intend to promote the use of public transport

- **Service Information:** It must be ensured that the information supplied in the development Access Map, Sustainable Travel Pack and Travel Information Points includes the locations of stops, routes, timetables, walking times to main public transport facilities, etc. Changes and improvements to public transport provision must be publicised as well.
- **Multi-Modal Trip Support:** Development users should be offered specific advice on combining public transport with other modes of transport, for instance travelling by bicycle between a bus stop and their home or workplace. In particular, information should be provided on the conditions under which standard or folding bicycles may be carried on bus and train services.

## 4.4 Implementation and Monitoring

The MMP is a document that evolves over time and requires ongoing implementation, management and monitoring, and for successful implementation requires organisational support, an internal Mobility Manager and financial resourcing.

To implement the MMP the following inputs are required:

a) Senior Management support and commitment
b) A Mobility Manager as the plan coordinator
c) A Steering group to oversee the plan
d) Working groups on various related issues

To ensure effective results from any initial sustainable travel investment it is imperative to obtain the agreement of all the stakeholders and obtain the support of external partners like the Local Authority, public transport operators, etc. Ideally the MMP will be managed by a Mobility Manager or travel plan coordinator with the clear mandate to implement and evolve the plan. The Mobility Manager will also be best suited to monitor the results of the plan.

The MMP will endeavour to influence the modal split from the outset of the completed development. Due to the location of the site and the alternatives transport modes available then the historic reliance on the car can be challenged. The issuance of welcome packs to the initial residents containing e.g. timetables of public transport and details of nearby facilities can be considered.

The document: *National Transport Authority Workplace Travel Plans - A Guide for Implementers* may be used as a reference. There is also a UK document: *Making Residential Travel Plans Work: Guidelines for new development* published by the UK Department of Transport 2005 which is relevant.

Residents travel surveys should be carried out in the early stages and annually to monitor the initial success of the travel plan and to gain a better understanding of the residents' travel habits. These survey results can also serve as a sustainable travel performance benchmark to indicate how the Travel Plan is performing in comparison to previous years and the sustainable travel targets initially outlined in the plan.

# 5 Conclusion

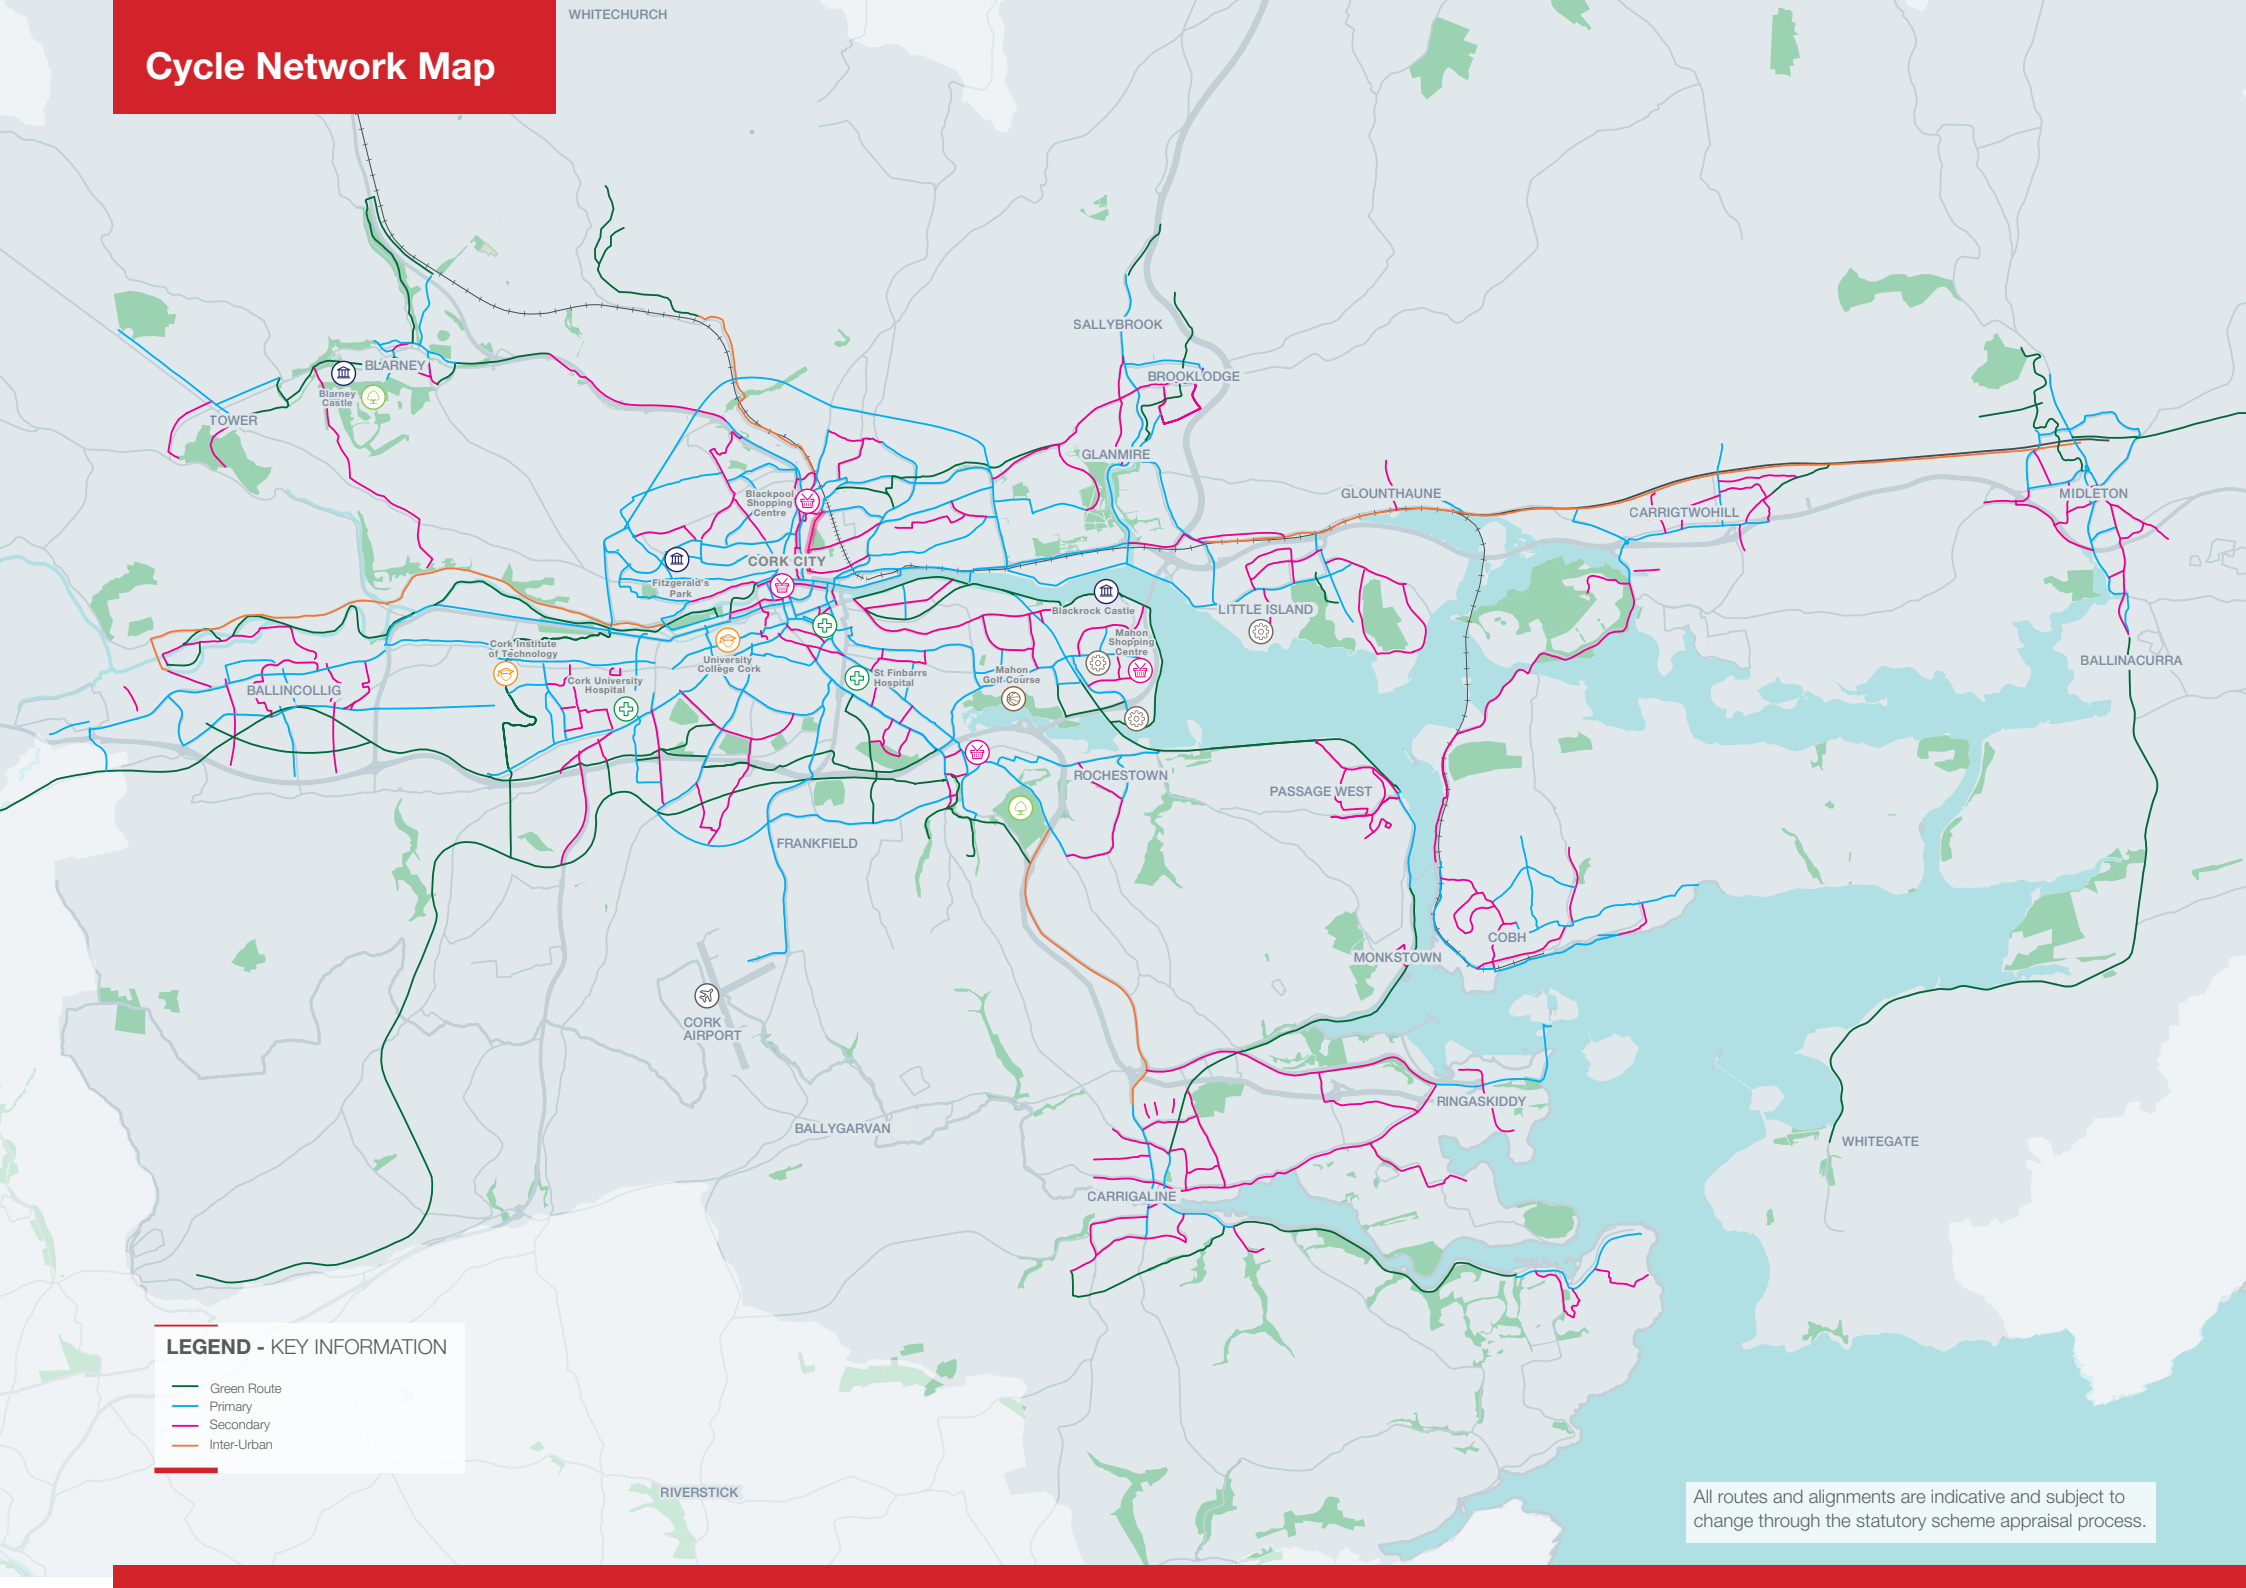

To establish an effective Mobility Management Plan, the development once occupied should submit the following information to the designated Mobility Manager or Travel Co-ordinator:

- Residents / Staff / customer travel survey information to establish the origin and destination of trips to and from the development.
- Outline specific schemes/measures implemented to encourage a shift from car dependant transport to and from the site.
- Results of residents / customer / staff comments.
- Targets to be set out in accordance to approved NTA guidelines and documents.
- An outline of the various schemes that the development, plan to make available to its staff to encourage the desired change in their travel patterns to and from work; such as shared parking facilities, cycle facilities, public transport subsidies, car-pooling, walking groups, cycle groups, communication, consultation, promotion and tax saver schemes.

The success of the Mobility Management Plan depends on the co-operation of all parties. The appointment of a Mobility Manager at the outset is important to initiate education of all the incentives and oversee implementation for the success of the plan. A Travel co-ordinator and a steering group comprising all stakeholders – the local authority; transport companies, residential and commercial representative is vital to maintain the transport system. This Travel Plan will need to be reviewed on a regular basis within the steering group with updates occurring as improvements to the transport network in the vicinity of the development site are implemented.

**FAO Mr Cian Murphy and Mr Andrew McCarthy, Punch Consulting**

Dear Cian and Andrew,

I refer to the request from Cork City Council to your client regarding the development of the former Vita Cortex Factory on Kinsale Road, Cork. In its LRD Opinion Report, the Council requested that the applicant would contact the NTA to ensure that the requirements of BusConnects *Sustainable Transport Corridor (STC) H – Kinsale Road to City* are taken into account in the subject planning application.

The NTA confirms that discussions have taken place with Punch Consulting concerning the proposed development at the Vita Cortex site on the Kinsale Road and its interface with STC H, and that the layout proposed by Punch Consulting in the drawing Document No. 213130-PUNCH-XX-XX-DR-C-0461 (Revision No. C02) (Model Ref. 214130-PUNCH-XX-XX-M2-C-0461) would not compromise the development of the necessary BusConnects infrastructure on this STC scheme.

For the avoidance of doubt, a copy of the reviewed drawing is attached to this e-mail.

Notwithstanding the confirmation of this matter, engagement by the NTA has been undertaken without prejudice to any future application that may arise at this location and any observations the NTA may submit to Cork City Council as part of the statutory planning process.

I trust this response will suffice for the purposes of inclusion in the planning application to the Council.

Yours sincerely,

Robert Parkinson,
Strategic Planning Section,
NTA.
